Ho Viet Hieu

“The highlights of the fellowship were that I had a chance to learn, shared experiments and had wonderful travel to two countries. The experts are very willing to share their knowledge in the research field. They are really very experienced.”

Ho Viet Hieu, Ministry of Health, Vietnam

Ho Viet Hieu is a researcher in the Department of Entomology at the Institute of Malariology, Parasitology and Entomology in Quy Nhon, Viet Nam.

Ho Viet Hieu completed his fellowship at the National Centre for Parasitology, Entomology and Malaria Control in Cambodia under the supervision of Dr Tho Sochantha. He also travelled to Thailand to receive further training from the Armed Forces Research Institute of Medical Sciences (AFRIMS) under the supervision of Dr Alongkot Ponlawat.

Through his APMEN Fellowship, Ho Viet Hieu learned the following techniques:

1. The method of Identify mosquitoes Anopheles Aedes, Culex and more
2. Identify tick, mite, dust mite
3. New knowledge and skill in rearing the mosquito, tick and mite
4. Set up new trap for catch Anopheles dirus.

“The highlights of the fellowship was that I had a chance to learn and perform experiments in two different countries. The experts are very willing to share their knowledge in the research field. I hope to introduce the APMEN scholarship to more candidates.”
