High Burden

• Request for modelling data
• Private Sector Engagement (guidelines, reporting, trainings)
Transition to elimination

- APMEN to assist member countries to be able to generate mapping (GIS)
- Sharing relevant data with communities
- Real time foci location – GIS
- Train and engage community for foci investigation
- Private Sector Engagement
- Real time reporting
- Q&A refresher trainings
Elimination

• Advocacy for sustained funding particularly in activities aimed at the prevention of reintroduction

• Training/support in adapting and developing national for Foci classification criteria and guidelines

• Hard to reach populations and engagement with private providers

• Making foci classifications actionable
